

Victims not villains

Overfishing

Sharks are often accidentally caught on fishing hooks and in nets.

Pollution

Destruction and pollution of shark habitats threatens their survival.

Finning

In some countries fishermen cut off the fins of sharks, leaving them helpless and unable to survive.

Sport

Many sharks are killed by sports fishermen who often keep the jaws for souvenirs.

What SEA LIFE are doing

We are campaigning to stop the worldwide exploitation of sharks. This includes collecting signatures to support a ban on shark finning across the globe.

Protect

Why we need sharks

Sharks are an essential part of the food chain and help maintain balanced and healthy oceans.
